Valentin Levanovich

Web Developer

PROFILE

Web Developer with 10+ years of commercial experience in WordPress and frontend development. I build corporate websites, landing pages, e-commerce projects, and custom web solutions using WordPress, PHP, JavaScript, React, MySQL, Docker, and Git. Also contributed to the migration of Mediacube.io from Framer to React.

WORK EXPERIENCE

● **Fernandes Media — Web Development Studio | 2026**

WordPress Developer

- Developed custom WordPress websites based on Figma designs.
- Built responsive layouts and integrated them into custom WordPress themes.
- Worked with WooCommerce, ACF, Flexible Content, and custom post types.
- Developed forms, filters, AJAX functionality, and dynamic content sections.
- Built and maintained multilingual websites.
- Integrated third-party services and external APIs.
- Worked with Docker, Git, Cloudflare, and server environments.
- Improved website performance, responsiveness, and cross-browser compatibility.
- Maintained existing projects, fixed bugs, and extended legacy functionality.
- Supported projects after launch and implemented ongoing improvements.

● **M.TOP LLC | 2024 - 2025**

WordPress Developer

- Created and improved custom website functionality.
- Worked with existing themes, plugins, and legacy code.
- Integrated Bitrix24, Google Analytics 4, Google Tag Manager, and Yandex Metrica.
- Worked with ACF, JetPlugins, Contact Form 7, WooCommerce, and custom PHP/JavaScript solutions.
- Fixed layout, performance, and functionality issues on existing projects.

● **Freelance / Project-Based Work | 2020 - 2024**

Web & WordPress Developer

- Converted Figma designs into responsive, pixel-accurate websites.
- Developed custom WordPress themes from scratch.
- Built custom functionality using PHP and JavaScript.
- Configured WooCommerce stores and dynamic content structures.
- Integrated third-party APIs, forms, analytics, and CRM systems.
- Improved existing websites and provided ongoing technical support.
- Prepared and deployed websites to production environments.

OTHERS PROJECTS

● **Mediacube.io — React Development**

Participated as a core developer in rebuilding the corporate website from Framer to React.

- Developed responsive pages and reusable React components.
- Implemented routing and project structure for multiple pages.
- Used Framer Motion / Motion for interface animations.
- Worked with multilingual content and localization.
- Implemented page-level SEO metadata and structured data.
- Worked with Cloudflare and Wrangler-based infrastructure.
- Integrated forms and external services.

WordPress Projects

Developed corporate websites, service platforms, landing pages, and e-commerce solutions using custom WordPress themes, WooCommerce, ACF, PHP, and JavaScript.

Representative projects include:

- driviovc.fr — service website development and WordPress integration.
- way-property.com — website development and migration.
- genius.city — custom WordPress development.
- kuzinakristina.com — custom WooCommerce store developed from Figma with responsive layouts, dynamic catalog functionality, ACF integration, and API-based features.
